V.N. Misra who passed away recently was related to which field?	<b>Archaeology</b>

**What is Project Loon?**

Project Loon is a project of **Google Inc.** In this project, balloons float in the stratosphere, twice as high as airplanes and the weather. In the stratosphere, there are many layers of wind, and each layer of wind varies in direction and speed. Loon balloons go where they're needed by rising or descending into a layer of wind blowing in the desired direction of travel. By partnering with Telecommunications companies to share cellular spectrum we've enabled people to connect to the balloon network directly from their phones and other LTE-enabled devices. The signal is then passed across the balloon network and back down to the global Internet on Earth. **Source:** <http://www.google.co.in/loon/>
